DIARY NOTES FOR COLONEL WHITE

A-DD/S *JK*

Friday, 9 August 1963

1. At the Executive Committee Meeting this morning:

a. Kirk reported on our meeting yesterday for developing a program for a scholarship fund for children of Agency employees and an Agency Association. General Carter expressed his personal concern about forming a "CIA Club," and said he wanted to see anything put in writing on this subject. *H*

b. In reporting on the meeting of the Special Group held yesterday, General Carter mentioned that Matt Baird had put on an excellent showing regarding our CIA Counterinsurgency Program. I later heard from Bill [REDACTED] that Matt thought it unfortunate that the Attorney General was not at the presentation since he is most interested in training programs.

2. After the meeting I had a short session with Kirk:

a. I alerted him that [REDACTED] has been cleared and has been invited to enter on duty in the near future. He is doing summer work on the West Coast, and when we know the definite date he will come on board we should let Kirk know so he can advise General Carter and the Director in case they run into his father, [REDACTED]

b. I showed Kirk the article about the Civil Service Commission's encouraging granting annual leave on 28 August and expressed my second thoughts about preparing an Agency Notice. We should handle this through a carefully worded statement at the Senior Staff Meeting on 19 August. Kirk agreed and I told Emmett to think about what he was going to say.

3. We were all sorry to read of the death of Dr. Don Carlos Faith. (Copy of article in Washington Post attached.)

7. Jack Earman gave me a draft of a memo he was thinking of sending to Kirk recommending that the Agency conduct, through the Medical Staff and the Offices of Personnel and Security, a study of our overseas casualty and adjustment problems of staff employees. I agreed to get some idea of the work involved and send it on to John Tietjen. John had heard of the study and I asked him to look it over and discuss it, particularly from these two angles: (1) how much work would be involved, and (2) how useful such a set of statistics would be.

8. [redacted] called and suggested that the special equipment in the Director's office be tested before he gets back on Monday. I spoke to [redacted] who said he would get [redacted] to check this one out before the end of business today.
